

Car Security and Advice

Don't forget to lock your car

Plenty of cars get stolen as a result of forgetful owners not locking their car. Even if you're only leaving the car for a short while - your vehicle or any valuables, are at a very real risk of theft.

Hide Valuables

Leave valuables at home if possible - if you do have them, never leave expensive items out on display within your car - it's too tempting for a thief. Make sure you hide them out of sight in the glove compartment or boot

Car Tracking System

Car tracking systems require a transmitter to be hidden in your car. If stolen, the vehicle can then be tracked and recovered

Car Alarm

Most modern cars come pre-equipped with an alarm. If you drive an older vehicle, getting an alarm professionally fitted will help secure your car and could result in cheaper car insurance. The threat of a piercing sound and flashing lights is a powerful deterrent.

Steering Locks

These tough metal locking devices prevent the steering wheel, gearstick or handbrake from being used when the car is not in use. Also acts as a visual deterrent.

Secure Parking

If your home has a driveway or a garage, use it. Cars parked off-street are far less likely to be stolen than those parked on the road. When away from home, try and leave your car in a secure car park.
